Deadline for manuscript  
submissions:

**31 August 2021**

### Message from the Guest Editors

This Special Issue comprises selected papers from the Proceedings of the 11th European Conference on Solar Chemistry and Photocatalysis: Environmental Applications (SPEA11) that will be held from 8 to 12 June 2020 in Turin, Italy.

The European Conference on Solar Chemistry and Photocatalysis: Environmental Applications (SPEA), started in 2000, reports the advances and future challenges in the field of photocatalysis, solar photochemistry, and environment-related applications.

The SPEA11 edition will cover research fields as varied as the following:

- Process fundamentals, modeling, and mechanistic studies;
- New materials and hybrid systems for photocatalysis and solar light utilization;
- Environmental photochemistry and photocatalysis;
- Green synthesis, H<sub>2</sub> production, and CO<sub>2</sub> utilization by solar photochemistry and photocatalysis;
- Air treatment;
- Water treatment and disinfection;
- Photo(catalytic) reactors, theory, and applications;
- Standardization and commercial applications.
